

Sunday Times Tech Track 100

SLA Mobile has been placed on the Sunday Times Tech Track 100 fastest growing technology companies list. Getting on the list is confirmation of the success of the company, whose sales soared by 45% per annum from £1.9m in 2005 to £5.7m in 2008.

"We are a global company that happens to be headquartered in Northern Ireland," said CEO Nic Stirk. "We provide international solutions for clients wherever they are based, from South Africa to Australia. Our philosophy of working with our clients to deliver on time and on budget is paying dividends."
